CRAFTSMAN. QUICK RELEASE RATCHETS

Unique handle shape provides comfortable, non-slip grip.

Torque strength consistently exceeds Federal Government requirements by a wide margin.

Nickel chrome plated handle for resistance to corrosion and abrasion.

Knurled speeder for rapid turning of fastener when loose.

Drop-forged one piece "I-Beam" design handle for maximum strength.

Precision tolerances of drive square allow for secure socket fit.

Durability proven by periodic lab tests of 1/2 million cycles without serious wear.

Fine tooth action permits use of ratchet where handle "swing space" is limited; 3/8" drive ratchet can be used where only 4.4° of arc available (1/4" drive = 4.0°; 1/2" drive = 5.1°).

Quick release button permits easy attachment and removal of sockets, even with greasy hands.

CRAFTSMAN. QUALITY SOCKETS

Case hardened for wear resistance.

Nickel chrome plating for rust resistance.

Guaranteed analysis alloy steel for consistent material quality.

Up to 25% lighter weight to minimize fatigue.

Up to 1/3 deeper serrations for broader application of uses.

Through hardened for strength.

Radiused corners for comfortable feel and impact resistance.

Thin wall construction for easy access to hard to reach areas.

Lead in chamfer on drive square for easy use.

Recessed drive square on most applications for accessory retention.

Available in 6 and 12 point serrations.

Ground and polished surface for easy clean-up.

FULL UNLIMITED WARRANTY ON CRAFTSMAN® HAND TOOLS

If any CRAFTSMAN® Hand Tool ever fails to give you complete satisfaction, simply return it to the nearest Sears store throughout the United States, and Sears will replace it, free of charge. This warranty gives you specific legal rights, and you may also have other rights that vary from state to state.

Chamfered box-end openings for easier positioning on fastener.

Thin walls on box ends for use on fasteners difficult to get at with open end.

12 pt. box ends enable use where only 15° swing space available.

Nickel chrome-plated for resistance to corrosion & abrasion.

Box ends offset 15° to provide clearance for knuckles and other obstructions.

Drop-forged from hot-rolled molybdenum alloy steel (AISI 4047) for maximum strength and durability.

Precision tolerances of box ends and open ends provide secure fit on nuts, bolts.

Tips of open end jaws are chamfered for easier placement of wrench on fastener.

CRAFTSMAN® WRENCHES

Open ends angled 15° to permit use on hex fasteners where as little as 30° swing is available (60° would be needed if head were straight).

Thin, narrow jaws for better access into tight spots.
